### Hygiene Vorschriften nach HACCP einhalten! Auszug von HACCP:

- Never refill milk container. Always throw leftovers away.
- Always clean the milk container before filling it with fresh milk.
- Fill up with fresh milk, chilled to 3 °C - 5 °C, just before restarting the machine.
- Use pasteurized or ultra high temperature treated (UHT) milk! Do not use raw milk! The milk must be homogenised!
- For optimum hygiene use a milk cooler (optional) to maintain milk temperature.
- If equipped the refrigerator / cool-ing unit (optional) must be cleaned at least once a week!
